

VIGNESWARAN H

Senior Frontend UI Developer | React.js | TypeScript
Bangalore, India | Phone: 6369900314 | Email: vigneseg@gmail.com
Linkedin: www.linkedin.com/in/vigneswaran-h

PROFESSIONAL SUMMARY

Senior Frontend UI Developer with 4+ years of experience building scalable, high-performance web applications using React.js and modern JavaScript. Proven expertise in design systems, TypeScript, Redux, and component-based architecture with a strong focus on performance optimisation, accessibility, and responsive design. Experienced in collaborating with cross-functional teams engineering, product, and design—to translate UX/UI mockups into production-ready interfaces. Skilled in REST API integration, CI/CD workflows, Git-based development, and Agile delivery. Familiar with UI testing frameworks (Jest, Cypress) and build tools (Webpack, Vite). Comfortable making minor backend contributions and open to expanding into Golang microservices.

CORE SKILLS

Frontend Technologies: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3

Design Systems & UI: Reusable Component Libraries, Storybook, Responsive Design, Accessibility (a11y), Cross-Browser Compatibility

State Management: Redux, Context API

Testing: Jest, Cypress, React Testing Library

API & Integration: REST APIs, Axios, Fetch API, JSON

Build Tools & DevOps: Webpack, Vite, Git, GitHub, CI/CD Pipelines

CSS & Styling: CSS Grid, Flexbox, CSS-in-JS

Methodologies: Agile/Scrum, Performance Profiling & Optimisation, Code Reviews

PROFESSIONAL EXPERIENCE

HCL Technologies | Bangalore, India | April 2022 – Present

Senior Software Engineer – Frontend (UI Developer) *October 2025 – Present*

- Develop and maintain scalable design system components and reusable UI libraries using React.js, TypeScript, and JavaScript (ES6+), working closely with designers and engineers.
- Translate UX/UI mockups and product requirements into responsive, accessible web interfaces, ensuring cross-browser compatibility and adherence to accessibility (a11y) standards.
- Architect and manage centralized state using Redux and Context API; integrate REST APIs for real-time data flows with secure authentication flows.
- Conduct UI performance profiling and optimization; implement code-splitting, memoization, and lazy loading to improve application speed and reliability.
- Drive code quality through structured PR reviews, maintain CI/CD pipeline contributions, and deliver within Agile sprint cycles.
- Champion accessibility and inclusive design practices across all frontend deliverables.

Software Engineer – Frontend *April 2022 – September 2025*

- Built core application modules—Dashboard, Service Requests, and Timesheets—using React.js with a component-based architecture following design system guidelines.
- Implemented Redux-based state management and integrated RESTful APIs to support real-time data on internal portals.
- Developed responsive, accessible UI layouts using CSS Grid and Flexbox, achieving consistent rendering across devices and browsers.
- Wrote unit and integration tests using Jest and React Testing Library to ensure code quality and prevent regressions.
- Participated in Agile ceremonies, contributed to sprint planning, and supported production release cycles.

KEY PROJECTS

My State Street – Online Banking Portal | Present

- Built a secure banking portal with a reusable React design system; integrated Redux and REST APIs for real-time data synchronization.
- Improved application load time by implementing code-splitting, lazy loading, and React.memo to eliminate unnecessary re-renders across high-traffic pages.

Employee Service Portal – MyHCL Tech | May 2022 – March 2024

- Developed a responsive internal portal with real-time dashboards; used Context API, REST APIs, Storybook, and Sass/CSS Grid for scalable, consistent UI layouts.
- Reduced dashboard render time by memoizing expensive computations with useMemo and useCallback, and virtualizing long data lists to improve scroll performance.
- Refactored legacy CSS to modular Sass architecture, reducing stylesheet payload and improving page rendering speed across low-bandwidth networks.

EDUCATION

Bachelor of Engineering (B.E.) – Electronics & Communication Engineering

AVS College of Technology, Salem – Anna University | 2017 – 2021 | CGPA: 7.8 / 10
