

VIGNESWARAN H

Senior Frontend Developer | React.js | JavaScript | TypeScript | 4+ Years
Bangalore, India | 6369900314 | vigneseg@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Senior Frontend Developer with 4+ years of experience delivering scalable, high-performance React.js applications in enterprise environments. Expertise in TypeScript, Redux, component-based architecture, REST API integration, and design systems. Strong track record of improving application performance through code-splitting, lazy loading, and memoisation. Collaborative team player experienced in Agile/Scrum delivery, CI/CD pipelines, and accessibility (WCAG/a11y) standards.

TECHNICAL SKILLS

Languages & Core: JavaScript (ES6+), TypeScript, HTML5, CSS3, Sass, Next.js

Frameworks & Libraries: React.js, Redux Toolkit, Context API

Styling: CSS Grid, Flex box, CSS Modules, CSS-in-JS, Responsive Design, Accessibility (a11y)

Testing, APIs & Data: Jest, React Testing Library, REST APIs, Axios, SQL

Tooling & DevOps: Vite, Git, GitHub, CI/CD Pipelines

Practices: Agile/Scrum, Performance Optimisation, Code Reviews, Cross-Browser Compatibility

PROFESSIONAL EXPERIENCE

HCL Technologies | Bangalore, India | April 2022 – Present

Senior Software Engineer – Frontend

October 2025 – Present

- Led development of scalable design system components and reusable UI libraries using React.js, TypeScript, and ES6+
- Architected centralised state management with Redux Toolkit and Context API; integrated secure REST APIs with real-time data flows
- Improved application performance by 40% via code-splitting, lazy loading, and React.memo optimisations

Software Engineer – Frontend

April 2022 - September 2025

- Built core modules (Dashboard, Service Requests, Timesheets) using React.js with component-based architecture and design system standards
- Developed accessible, responsive UI with CSS Grid and Flex box; maintained test coverage using React Testing Library.

KEY PROJECTS

My State Street – Online Banking Portal

Present

- Built a secure, high-traffic banking portal using React.js, TypeScript, and Redux Toolkit with a reusable component design system.
- Reduced load time by 40% via code-splitting, lazy loading, and memoisation — directly improving user retention on critical banking flows.

Employee Service Portal – MyHCL Tech

May 2022 – March 2024

- Developed a responsive internal HR portal with real-time dashboards using Context API, REST APIs, Storybook, and Sass/CSS Grid.
- Improved dashboard render performance by 35% using useMemo, useCallback, and list virtualisation for large datasets.

EDUCATION

B.E. – Electronics & Communication Engineering CGPA: 7.8 / 10

AVS College of Technology, Salem – Anna University | 2017 – 2021
